(10'-0 '')

3.0 m max.cts.

PLAN

NOTES

Barbed wires shallbe tied to each post. Top and bottom wire of woven fence shall be tied to each post. Tie every other wire between, alternating on sucessive posts.

Barbed wires and line wires of woven fence shall be be fastened to the corner, end, pull, and gate posts by wrapping the wires around the post and tying back on itself with not less than 3 twists tightly wrapped.

GENERAL NOTES

Pullposts shallbe placed at the locations determined by the Engineer. They shall be placed at 200 m (660") intervals between posts to which the ends of the fabric and barbed wires are fastened or midway between such posts when the distance is less than 400 m (1320") and greater than 200 m (660").

Bracing for gate posts shallbe the same type used for end posts.

The clearance between the bottom fence wire and the ground may be up to 75 mm (3 $^{\prime\prime}$) for a maximum distance of 2.4 m (8 $^{\prime}$) when uneven ground is encountered.

All dimensions are in millimeters (inches) unless otherwise shown.

WOVEN WIRE FENCE

(Sheet 3 of 4)

STANDARD 665001-01

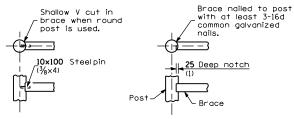

NOTE

X + Y shall not exceed **685** (27), **840** (33), or **1.14 m** (3'-9") as applicable. When X is **0** to **300** (12), **450** (18), or **760** (30), Y= **380** (15), and the post shall be shortened as required. When X exceeds 300 (12), 450 (18), or 760 (30), Y shall be decreased correspondingly.

FOOTING FOR POSTS WHEN ROCK LEDGE IS ENCOUNTERED

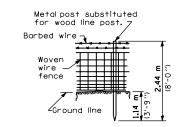

ALTERNATE DETAILS FOR FASTENING WOOD BRACE TO WOOD POST

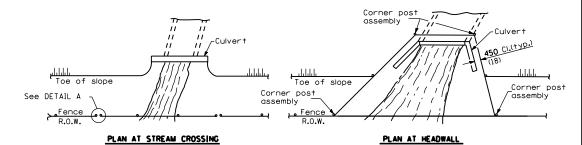

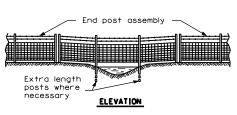

Where fence line has a change in direction of 15° of more, a corner post wth bracing as required shall be placed as shown above. Where angle is less than 15° and existing conditions require a corner post, they shall be placed as directed by the Engineer.

INSTALLATION AT CORNERS

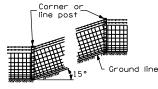

PROTECTIVE ELECTRICAL GROUNDING FOR WOOD POST FENCE INSTALLATION

The woven wire fabric shall be replaced by barbed wire strands at 300 (12) maximum centers between the double posts shown on DETAIL A when shown on the plans.

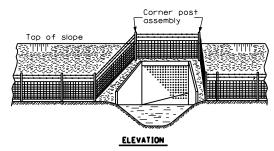

INSTALLATION OVER STREAM

Where grade line has a change in slope of $15\,^{\circ}$ or more, a corner post with bracing as required shall be placed as shown above. Where angle is less than 15° line posts may be used.

When the tension of the fence tends to pull the posts from the ground, the line posts shall be anchored with the applicable concrete or wood anchorage specified for corner posts.

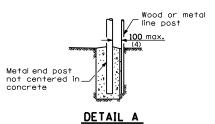

INSTALLATION ON SLOPES

NOTE

When the width of the culvert makes it necessary to anchor a post to the top of the culvert, a cast iron shoe or other device approved by the Engineer shall be used.

INSTALLATION AROUND HEADWALL

All dimensions are in millimeters (inches) unless otherwise shown.
